

2009-2010

ANNUAL BUDGET

Notice of Budget Committee Hearing

A public meeting of the Budget Committee of the City of Adair Village, Benton County, State of Oregon, on the budget for fiscal year July 1, 2009- June 30, 2010, will be held at Adair Village City Hall, 6030 William R. Carr St., Adair Village, Oregon. The meeting will take place on Monday, May 11, 2009 at 7:00 PM. The purpose of the meeting is to receive the budget message and to receive public comment on the budget. A copy of the budget document may be inspected or obtained on or after noon on May 7, 2009, at Adair Village City Hall, between the hours of 8:00 AM and 5:00 PM.

This is a public meeting where deliberation of the Budget Committee will take place. Any person may appear at the meeting and discuss the proposed programs with the Budget Committee.

NOTICE OF BUDGET HEARING

A meeting of the City of Adair Village City Council will be held on June 15, 2009 at 7:00 PM at the Adair Village Community Center, 6030 William R. Carr Avenue, Adair Village. The purpose of this meeting is to discuss the budget for the fiscal year beginning July 1, 2010 as approved by the City of Adair Village Budget Committee. A summary of the budget is presented below. A copy of the budget may be inspected or obtained at 6030 William R. Carr Avenue Adair Village between the hours of 8:30 AM and 4:00 PM. This budget was prepared on a basis of accounting that is consistent with the basis of accounting used during the preceding year. Major changes, if any, and their effect on the budget, are explained below. This budget is for the annual period of July 1, 2010 through June 30, 2011.

File with your assessor no later than JULY 15, unless granted an extension in writing.

Fiscal Year 2009-10 Budget Message

TO:	Adair Village Budget Committee
FROM:	Drew Foster, City Administrator/Budget Officer
DATE:	April 28, 2009

Introduction

I am pleased to present the Budget Committee and members of the community with the Adair Village Budget for Fiscal Year 2009-10. This budget demonstrates the continued overall fiscal stability of our community's finances. The City continues to meet its current financial obligations and has initiated necessary preliminary planning and design work for our major capital improvement projects.

This budget continues a conservative budgeting philosophy of prudent revenue estimates and some ability to meet unexpected expenditures or requests for funding that frequently occur. This financial plan addresses our long-term future for capital needs, which have been identified primarily in the water and wastewater facility plans. Footnotes are provided at the bottom of the budget sheets where some added information and detail is likely to be helpful.

Background and Process

The Budget Committee is comprised of the City Council and an equal number of "lay citizens". The charge for the committee is to review the budget, as prepared by the Budget Officer, and recommend changes as appropriate based on the Committee's input. With the proposal of a new fund and the beginning of a program for major capital improvements, the Committee will use an initial work session to review the budget approach and basic information, followed by a second session with an opportunity for public input and to finalize the Budget Committee's proposal to the City Council.

State law establishes many of the items, processes, and format of municipal budgets. It requires that we advertise and hold hearings on the budget and various components such as state revenue sharing. State law requires the budget to provide background information on the actual revenues and expenditures for the previous two years. This is shown in the first two columns of the budget sheets. The next column shows our current adopted budget, and then the proposed budget developed by the Budget Officer. The process then provides for changes by the Budget

Committee that are forwarded to the City Council for further hearings and final adoption by resolution.

The City uses a fund approach to comply with generally accepting accounting procedures. These funds include the basic program funds-the General Fund, which is divided into six sub-sections (the sixth fund is a separate budget that focuses on grants that will allow the Public Safety program to be expanded at an accelerated rate), Water and Wastewater Funds, a Stormwater Fund, the Street Fund, and a small Reserve Fund. The General Fund is where non-restricted revenues and expenditures are detailed and is comprised of the various departments that operate from the general revenue dollars. The Water and Wastewater Funds function as enterprise funds under a different set of accounting standards that basically provide these funds operate as not-for-profit business. The Street Fund is termed a special revenue fund, because the gas tax revenues that support this fund are required by law to be used for street purposes. All the City funds are detailed below.

There are some universal issues that you will note throughout the budget. The City has made a commitment to establish pay rates that are in line with the <u>average</u> pay for similar positions in similarly sized cities and this commitment has been achieved for present City staff. The Budget includes the option for salary increases five (5) percent, but the decision to enact any raises will be greatly affected by the present national and state economy. Benefits are expected to remain in similar proportion to salary as last year's budget and have been incorporated as such.

Transfers are being budgeted and will be utilized to ensure that each fund is balanced and able to operate within budgetary limits. The following provides additional detail about each of the funds.

General Fund

The General Fund accounts for general revenues and operating expenses and funded primarily by tax, State shared revenues, and other fees. Of note is the increasing Beginning Fund Balance, which reflects the City's increasing financial health. There are five (5) sub-accounts that make up the General Fund; they are Administration and Planning, Building Permit, Non-Departmental, Parks, and Public Safety. There is also a Public Safety-Grants page. This format was used because these line items will only become effective if the grant applications are successful.

A number of new expense line items are included in the sub-Fund budgets. They include Equipment Lease, Equipment Rental, and Equipment-Small Purchases (for non-capital outlay purchases). In my review of the existing budget and tracking processes, I found that the City needed greater clarity in our tracking process, as there were three line items that included "Maintenance" as part of their definition. There is also a new line item of Building Improvements, which will be used to cover small improvement projects undertaken at City Buildings, other than the Water and Wastewater plants. City staff will make a significant effort to enter items in appropriate categories, which will enable the City to develop a much more complete view of how resources are committed.

<u>ADMINISTRATION</u>: All basic consultant contracts-Attorney, Engineer, and Planner-will be funded from this sub-account. Additional engineering costs for specific projects are included in

the Water and Wastewater and in the future, may be included in Stormwater and Streets. There is a line for Contracted Services-Codification, which will be used to complete the reorganization of existing City documents, ordinances, and resolutions and to develop a City Code, which organizes that information. The Code Enforcement Officer has been moved to the Public Safety budget.

<u>BUILDING:</u> The Building Department sub-account, basically serves as a "pass-through" with moneys coming in from building permits and being paid out to the County and State. We expect limited revenues, since the City is virtually "built out" with very few vacant lots. This department has limited revenues at this point in time. The County is paid 70% of the permit fees and the City keeps 30%. Last year, the City received applications for permits for the Santiam Christian School Library. This put both the revenue, money received from SCS, and expenses, a portion of those funds paid to Benton County and the State, over last year's budget.

<u>NON-DEPARTMENTAL</u>: This sub-account consolidates many "non-departmental" operating expenses into one area that are not directly attributed to other departments and serves no purpose in breaking out to other operations. The revenues come from the same sources in the General Fund to cover these expenses. All General Fund expenses for Postage and Telephone are now located only in Non-Departmental, since we have no tracking system to break them out amongst the General Fund sub-accounts, other than for Public Safety. The line item that formerly was Power & Lights, or sometimes Electricity, is now defined as Utilities and includes electricity, natural gas, and garbage expenses. The RARE student and the City's new Municipal Court are included in this sub-account. We completed a pre-application for a RARE student for 2009-10 budget year, but will not know until June.

<u>PARKS</u>: The City will continue to fund a Summer Coordinator position, which will be supported by the RARE student. The budget provides for increased levels of service as the City attempts to expand programs, primarily for community teens. The "Contract Services" line item is for OMI public works services.

<u>PUBLIC SAFETY</u>: Last year was the first year for this account. Chief Justin Jones was hired in February and has been hard at work organizing the Police Department. Much of the equipment, weaponry, and uniforms for the reserve program came from the 2008-09 budget.

The new budget represents the implementation of a reserve and cadet program, including training and equipment for that program, so there is a large training line item. The Code Enforcement position will be integrated into the reserve program. Two cars will be leased with an option to buy.

In the first few years, this sub-account will be funded from General Fund revenues. In the long term, a separate set of revenue resources will need to be established and these resources may include and increased tax base. Chief Jones has been very busy pursuing grant opportunities and there is a separate sub-account, Public Safety-Grants, that represents additional program facets, including full-time officers, that will come into being, if the grant applications are successful. Since the very existence of these positions and equipment rely on grants, the simplest, clearest way to present the budget was to present them as a separate account.

Reserve Fund

This fund operates as the City's "savings account" where we hold money in "reserve" for future capital expenditures. This fund is established by resolution of the City Council specifying the purposes for which this money is being held. In our case the money is being saved to cover basic plant, building and equipment needs. The initial budget would commit Reserve Funds to support the planning and pre-design activities for rebuilding the Water and Wastewater facilities. Generally, these funds will role forward.

Storm Drain Fund

Personal services are seen as a line item only to complete the tracking process for services that were zero out in FY 2006-07. Revenues are paid from the monthly \$1 storm drain fee on the City utility bill. Contract Services again represent public works services provided by OMI. The 2007-08 budget accounted for over \$14,000 from the Storm Drain Fund to cover a portion of OMI for that year. This was more than the whole Storm Drain Fund and left this Fund without any beginning balance.

Street Fund

This fund is a "special revenue" fund and designed to track revenues the City receives from the gas tax. These monies, by law, may only be spent on transportation related items, including bike paths. Revenues are based on a per capita basis and anticipated to be higher this year based on the City's higher population, which is certified after the start of this fiscal year.

System Development Fund

This fund documents the resources and expenditures of System Development Charges and fees received by the City in conjunction with local development. They are regulated by State statute and may be utilized for only specific purposes associated with capacity enhancement. The revenues include a "reimbursement allowance" for prior expenditures and bonded debt. The reimbursement portions you will note are transferred to the Water and Wastewater Fund and used to meet our debt obligations for revenue bonds. By separating these revenues from the operating funds (street, water and wastewater) we prevent them from being "co-mingled" with operating revenues and expended for unauthorized purposes.

Because these funds are uncertain, they are budgeted as "money in – money out" and generally do not have a significant impact on the budget regardless of development patterns. This year the City may need to access both the Water and Wastewater SDCs for facility plan updates and predesign work for both systems. This should allow us to begin work on the Water facility upgrade in the next budget cycle. The City is close to completion with its new SDC rates and these will be in place before the UGB (Urban Growth Boundary) expansion is complete. The City received an SDC for one water connection in the 2008-09 budget year.

Wastewater Fund

The revenues in this fund come primarily from User Fees and remain relatively constant. There are significant planning expenses and pre-design work that need to be undertaken in the next two years. The I/I (Inflow and Infiltration) Study required by the City's NPDES (National Pollutant Discharge Elimination System) permit was completed this year. We will begin project implementation for the first phase of sewer line improvements in the 2009-10 budget year. We have Telemetry improvements required by the NPDES permit by December of this year. We plan to use 2008-09 funds to accomplish this, but depending on timing some funding support may come from the present year.

The revenue is designed to keep the City current on operating and debt service. The unappropriated fund balance, which is unavailable for expenditure, is designed to serve as the reserve needed to meet the City's bond reserve requirements. We have the Reserve Fund available in order to meet the needs of this Fund's debt service, if necessary.

Water Fund

The Water Fund budget reflects an increased cash position, which will be beneficial in the event the City continues to move forward in becoming a regional water provider. We are working to answer all the issues that were presented in our Water Facility Plan update and we have begun preparations for a complete replacement of the existing Water facility and primary transmission lines. Aerial Mapping will be completed in the present budget year.

The Water Fund's Engineering line item will support continued work in pre-selection of major equipment-pumps, membranes, tanks, etc.-and work on preliminary plans, layouts, and predesign work. Upgrade of the Water facility and transmission lines takes precedence over Wastewater issues, though we need to make progress on both upgrade issues.
