

**2020-2021**

**ANNUAL BUDGET**

## Fiscal Year 2020-21 Budget Message

TO: Adair Village Budget Committee  
FROM: Pat Hare, Budget Officer  
DATE: April 2020

### Introduction

I present the Adair Village Budget for Fiscal Year 2020-21 to the Budget Committee and members of the community. The City's Budget shows the continued fiscal stability of our community's finances. The City continues to meet its current financial obligations, and we have been able to implement projects to obtain critical pieces of property, continued to reduce water loss, complete building projects, and foster growth.

The City of Adair Village has followed the COVID-19 situation carefully by regularly seeking out the official guidance from the Governor's office and the CDC. This budget and the process laid out meets all regulatory requirements. The City's response has focused on the health and safety of its staff and citizens, while also maintaining the services provided by the City.

The Public Works staff's hard work has kept the City moving forward with the continued maintenance and improvement programs while producing sufficient water to the community. Our Public Works staff, led by Supervisor Matt Lydon and supported by Utility Worker III Eric Harvey, will continue to improve all of our facilities, and to make upgrades to our City's infrastructure. In the last fiscal year, the City has partnered with the City of Tangent to run their wastewater facilities. We will also be looking to hire a new employee asap.

The City will continue to strengthen our financial management systems with a focus on segregation of duties in our daily activities. Utility Clerk Kathy Edmaiston continues to work full-time handling utility billing and all accounts receivable and recording meetings. The City continues to contract with Smith-Wagar Brucker Consulting LLC which has allowed the City to get caught up and to stay current on our audits, and to be another financial resource in preparation of the budget and fiscal responsibility. This year the City began using government accounting software, Caselle, for its utility billing, accounts payable and other accounting functions. The cloud-based software will significantly streamline each function and allow for better tracking of funds and more efficient audit preparation.

The Finance Clerk will continue as a part-time position. This position will continue to focus on accounts payable. The Finance Clerk will assist in preparing the budget and will become more involved in the audit process.

This summer we are budgeting and preparing to have a summer program but are unsure of what the landscape will look like.

The City has added 58 homes this year which will increase the tax base significantly. In addition, the City expects an additional approximately 50 homes to be built this year, adding further to the tax base benefitting the budget next year.

All of the City's General Fund income resources from the State-cigarette and liquor taxes and state revenue sharing are expected to increase somewhat due to the marijuana tax. Assessed value on property within the City is anticipated to increase slightly this year due to the completion of Serve Pro. In Oregon, property tax growth lags actual growth. Assessed value for the next fiscal year is based on property values as of January 1. Although significant growth is expected during this calendar year, the City will not realize the tax benefit from that growth until November 2020. Our utility franchise fees have remained consistent or have grown slightly.

We have made an effort to provide prudent revenue estimates and still leave the City with some ability to meet unexpected expenditures or requests for funding that frequently occur. Staff closely tracks our expenditures and we continue our efforts to provide consistent beginning balances across all our Funds.

The City has been preparing and planning for the replacement of the 60 year old wastewater system and now has a plan approved by Department of Environmental Quality to do so. The City is seeking different funding sources for the 9 million dollars it will take to replace the wastewater plant. Because of its preparation, the City will not have to make drastic increases to utility bills to cover this cost but there will be step increases over the next few years to reach the affordability index. Currently the City rates are \$56.50 a month for wastewater, the affordability index for Adair Village shows the rates should be at \$62.50. This is the rate at which the City will be eligible for low interest loans, grant funding and potential matching funds. With the new development of additional homes and the rate increase, the City will be able to afford the 9-million-dollar project in phases over the next five years. There will be an increase of \$3.00 for wastewater as of July 1, 2020. The City will continue to monitor expenses closely this year.

Footnotes are provided at the bottom of the budget sheets where some added information and detail is likely to be helpful in explaining changes to a line item.

### **Background and Process**

The Budget Committee is comprised of the City Council and an equal number of "lay citizens". The charge for the Committee is to review the budget, as prepared by the Budget Officer, and recommend changes as appropriate based on the Committee's input. The initial work session involves the first public hearing and provides background information for the Budget Committee. The second session, allows the Committee to review the budget approach, each Fund's revenues and expenses, and basic information on long-term planning. The major issue affecting the budget is our continuing preparations for major capital improvements in our wastewater facilities. The Committee will have the opportunity at the second meeting to finalize its recommendation to the City Council or to schedule a further meeting.

State law establishes the format, processes, and many specific items to be included in a municipal budget. It requires that we advertise and hold hearings on the budget and various components, such as state revenue sharing. State law requires the budget to provide background information on the actual revenues and expenditures for the two years prior to last year's budget. This is shown in the first two columns of the budget sheets. The next column shows our current adopted budget and the fourth column shows the proposed budget developed by the Budget Officer. The process then provides for changes by the Budget Committee that are forwarded to the City Council for further hearings and final adoption by resolution.

The City uses a fund approach to comply with generally accepted accounting procedures. These funds include the General (divided into five sub-sections), Water, Wastewater, Storm Drain, Streets, Reserve, and Systems Development Funds. The General Fund is where non-restricted revenues and expenditures are detailed and is comprised of the various departments that operate from the general revenue dollars. The Water, Wastewater, and Storm Drain Funds function as enterprise funds under a different set of accounting standards that stipulate that these funds operate as not-for-profit. The Street Fund is considered to be a special revenue fund, because the gas tax revenues that support this fund are required by law to be used for street purposes. All the City funds are detailed below.

There are some universal issues that you will note throughout the budget. The City has made a commitment to establish pay rates that are in line with the average pay for similar positions in similarly sized cities and this commitment was met for the present City staff at hire.

The PERS contribution rate will go up this year but the City has prepared for this over the last few years so it will not have a major effect on the overall budget. City staffs are members of the Oregon Public Service Retirement Plan (OPSRP), which requires a lower contribution rate than the older Tier 1/Tier 2 plans.

### **General Fund**

The City has contracted with the City of Tangent, Oregon, to provide wastewater services. This will have a significant positive impact on the wastewater fund and the General Fund. The City also purchased the 4-plex on William R. Carr St. directly across from City Hall. Rent from each of these units will contribute to the General Fund. We also expect higher planning fees due to more reviews because of the additional homes in Calloway Creek but that is charged back to the developer.

The General Fund accounts for general revenues and operating expenses, and is funded primarily by tax, shared State revenues, leases and other fees. Overall, I expect General Fund revenues to increase slightly due to added tax revenues and slight increases in most franchise fees.

There are five (5) sub-accounts that make up the General Fund; they are Administration and Planning, Building Permit, Non-Departmental, Parks, and Public Safety. Building Permits are now handled solely by Benton County - which means there is no income for the Fund, very limited expense, and only a small amount of personnel time required. Information about these individual sub-accounts is presented below.

**ADMINISTRATION:** All basic consultant contracts-Attorney (general services), Planner, and Community Service (code enforcement)-will be funded primarily from this sub-account.

Additional attorney, engineering, and planning costs for specific projects are included in the Water, Wastewater, Storm Drain, and Street Funds under Contract Services. Personnel Services costs include ongoing work of planning, meeting preparation, contracts, franchises, and leases, and reporting to the City Council and State and Federal agencies. Personnel Services costs will increase this year due to minimum wage, health insurance and PERS contributions. The City will also continue to contract with for the services of Patrick Depa, a Planner shared by Benton County, Monroe, Philomath, and Adair Village. Having a professional planner has fostered vastly better communication between the County and the City. The expertise he brings has allowed the work of planning for the City to be done thoroughly and professionally. It has also fostered better follow through with all planning applications. The City has also benefitted by the sharing of ideas and best practices being implemented in one location.

NON-DEPARTMENTAL: This sub-account consolidates many “non-departmental” operating expenses into one area that are not directly attributed to other departments and serves no purpose in breaking out to other operations. The revenues come from the same sources in the General Fund to cover these expenses. All General Fund expenses for Postage and Telephone are now located only in Non-Departmental, since we have no tracking system to break them out amongst the General Fund sub-accounts, other than for Public Safety. Staff has completed most of the work associated with the \$100,000 five-year loan for the work on the community area. With additional funds this year from taxes and property leases, the City will have the additional funds to cover the loan payments.

PARKS: We are working on a grant for the park in between City Hall and the barracks, including a sound barrier wall, a walking path cover for the town square, and bathrooms.

PUBLIC SAFETY: The budget for Public Safety will remain the same for this budget year. The City will continue to contract with Benton County Sheriff’s Office (BCSO) for patrol services which are in addition to the regular patrol hours received simply as part of BCSO county-wide services. There is a small Personnel Services charge which represents five (5) percent of the City Administrator’s salary, which is used in coordination and oversight of the BCSO contract.

### Reserve Fund

This fund operates as the City’s “savings account” where we hold money in “reserve” for future capital expenditures. This fund is established by resolution of the City Council specifying the purposes for which this money is being held. In our case, the money is being saved to cover basic plant, building, and equipment needs. In fiscal year 2017-2018, the City began to utilize this fund as a true reserve fund. Money that had previously been designated in individual funds for certain purposes has now been transferred into the one holding fund. Additional transfers in to fund future capital acquisitions are budgeted for the upcoming year.

### Storm Drain Fund

The charge for storm drains was raised to \$4.00 per month per resident household in 2019. The fund is beginning to level off. We now have more requirements from the Department of Environmental Quality to meet storm water quality which has resulted in higher operating and reporting costs. We will have to watch this fund carefully but we are not proposing an increase at this time.

### **Street Fund**

This fund is a “special revenue” fund and designed to track revenues the City receives from the State’s gas tax. These monies, by law, may only be spent on transportation-related items, which may include pedestrian and bike paths. Revenues are delivered on a per capita basis and anticipated to be higher this year based on the City’s higher population, which is certified after the start of this fiscal year. Revenue from this State fund has increased slightly over the last three years. The City’s CIP (Capital Improvement Program) will commit \$12,000 per year in improvements to a section of street and to ADA (Americans with Disabilities Act) improvements to the sidewalks when appropriate. Improving sidewalks in conjunction with street improvements is a requirement.

This year we had an opportunity to piggyback on a project on William R. Carr which saved the City \$15,000. As a result, the City will save Street Funds this year and look at doing a street project next year.

The long term plan is to fund an overlay project every other year; this schedule works best in order to account for the cost of mobilization of the equipment. In this budget cycle, the City will be using these funds to seal the cracks around town. The review from the Benton County engineering staff shows that while the surface pavement needs to be replaced throughout the Loops, the road beds are in very good shape.

### **System Development Fund**

This fund documents the resources and expenditures of System Development Charges and fees received by the City in conjunction with local development. They are regulated by State statute and may be only utilized for specific purposes associated with capacity enhancement. The revenues include a “reimbursement allowance” for prior expenditures and bonded debt. The reimbursement portions are transferred to the Water and Wastewater Funds and used to meet our debt obligations for revenue bonds. By separating these revenues from the operating funds (street, water and wastewater), we prevent them from being “co-mingled” with operating revenues and expended for unauthorized purposes.

Because these funds are uncertain, they are budgeted as “money in – money out” and generally do not have a significant impact on the budget regardless of development patterns. The City will update its CIP (Capital Improvement Program) every year to account for new, known needs and the SDC rates to account for inflation. It was important to put a new SDC program in place before the UGB (Urban Growth Boundary) expansion is complete. The City saw a significant increase in this fund from the development of the Calloway Creek and William R. Carr Subdivisions New SDC methodology was implemented which increased the impact on the fund significantly.

### **Wastewater Fund**

The City has been preparing and planning for the replacement of the 1950’s wastewater system for many years. Although an increase at this time is difficult given general financial strain and uncertainty, we are looking at a modest increase in wastewater fees in order to replace the plant in five years.

The revenues in the Wastewater fund come primarily from User Fees and had remained relatively constant since the last increase. The Wastewater Fund is a Proprietary fund, which means that it develops its own revenues by delivering a service. It is designed to keep the City current on operating costs and debt service, but with increasing needs for maintenance and repairs, the unappropriated fund balance for this fund has gotten smaller over the last five years.

Last year we proposed an increase in the wastewater fee of approximately 7.75 percent. This allows the City to keep up with inflation and to continue to provide basic maintenance and operating costs, and has brought the Wastewater Fund balance into a positive position.

In 2015, the City received a \$100,000 loan from Oregon Department of Environmental Quality (DEQ) to complete a Wastewater Facility Plan update. The City currently has \$33,000 left to complete the facilities plan, which should be completed during the current fiscal year.

Over the last five years, since bringing our Public Works back in house, we have focused on becoming more self reliant. This year's budget will not show an increase in the system maintenance and repair line item, as we are hoping that we addressed the major issues.

### **Water Fund**

The Water Fund is also a proprietary fund. The water rates were last increased on June 15, 2015. This rate allowed the City to undertake the \$2.84 million water tank project that was funded with an Infrastructure Financing Authority (IFA) loan. The last payment on the IFA loan was made this year. There will be no increase in water rates for City customers. However, there will be a small increase in water rates for outside water customers in order to reflect the charges incurred to maintain the City's system and additional infrastructure needed to service them as well as to allow for money to be put in reserve for upgrades needed to the system.

The City is looking at doing two projects; a new pump station, improvements to the water plant, new filter sand, plumbing, new railing and some painting.

### **Capital Improvement Program (CIP)**

The CIP focuses on present needs and the time frame for purchase varies from one year to five years. These items will be tracked in Capital Outlay in the appropriate Fund. This means that for most of these items, the funds budgeted in Capital Outlay will not be spent and will carry over into the next year.

### **GENERAL USE**

Cost for these items will be split amongst the four Public Works Funds at roughly these percentages-Storm Drain (8%), Streets (12%), Wastewater (30%), and Water (50%). These rates will vary slightly to simplify tracking the items across Funds. To qualify as a Capital Outlay, the purchased item must cost more than \$5,000.

#### **Vehicle/Trailer (2019-2020 Budget)**

The City has been putting money in the capital outlay fund for a new vehicle in public works. The City bought two Priuses this year and will be purchasing a new trailer.

**Accounting Software Caselle**

The City purchased Caselle, a fund accounting software package.

**STREETS**

**Street Overlay-\$12,000 per year**

The City decided last year to put this money aside for a project to take place every other year. In this budget, the City will be putting any street improvements off for another year largely because of the street improvements on William R Carr Street that occurred with the development project there.
