NEW TOWN SQUARE

The City is excited to let everyone know that the new town square is finally completed. Many of you may have noticed the work being done by the two barracks buildings over the last several months. The project took a little longer than expected due to some cracking in the concrete. The town square had to be ripped out and replaced. I am glad to say that the new square looks great and will be ready for the spring Founders Day event.

This project was just one step of a much larger community center project including renovating the two barracks buildings. The City Council will be discussing this project at the February 7th and March 7th City Council meetings. It has been long discussed that the City will be utilizing one barrack for preserving the history of this area and the other one for a youth program/community hall. Over the last few months the City has been discussing the possibility of connecting the Model Railroad in town to the youth and history of this area by placing them together in the other barracks. By partnering with the Model Railroad the City may be able to start work on one of the barracks and receive funding that we wouldn't otherwise be able to access.

This is an exciting development for the City as we are also working with Benton County to receive the property across from City hall that includes the old gas station and the baseball field. The City still needs to go through some federal processes to acquire the property and then again to change the utilization but this is a major step for the City in securing a future downtown. We invite all of you to join in the discussions about the future of Adair Village.
