## WEATHERIZATION EDUCATION

Many of the homes in Adair’s two loops have water pipes running through the attic and they are often not insulated. It is worth your time and money to have a professional look at the system in your attic and make sure the pipes are insulated. Every Adair home can help protect their pipes with these tips:

**Turn on the taps:** Let the water drip in extreme cold. Even if the water does freeze, this will relieve some of the water pressure and keep the pipe from bursting.

**Open cabinets:** Leave the cabinets open under your kitchen and bathroom sinks. This keeps warm air circulating around your pipes.

**Wrap the pipes:** If your pipes are in areas that don't get warm air, consider insulating them with foam rubber or fiberglass sleeves from your local hardware store, or call a plumber to do it for you.

**Seal the gaps:** Cracks in your home’s out-side walls or foundation should be caulked to keep cold air away from your pipes.

**Drain your pipes:** If you're taking a trip in the winter, consider draining your pipes to prevent them from bursting. Shut off the main valve and then turn on all the taps (hot and cold) and let the water run until the pipes are emptied.

## STORMWATER EDUCATION

Spring is almost here and some of you may be starting your annual spring cleaning. Help keep our environment healthy with a few simple steps:

**Sweep up any loose debris** rather than washing it into the street.

**Find hazardous wastes** like paints, oils, vehicle fluids, or pesticides should not be flushed or poured down the drain. Instead, check for one of Republic Service’s Residential Household Hazardous Waste Events.

**Secure loose materials** like dirt or mulch with a tarp over top of it to prevent the material from being washed away before it can get placed in your gardens.
